Here's your one-stop shop for weather and climate information

Latest weather forecast

Here is the latest Met Office weather forecast for the UK, just type in a place name in the forecast search bar at the top of the page and get a detailed, site specific 7 day forecast or scroll down the page for a 30 day regional forecast.

Check out the weather map for weather information such as temperature, rainfall and wind gusts as well as UV and pollen levels. You can also find surface pressure charts which will show you high and low pressure patterns.

See the up to date presented forecast on YouTube

If you are a media outlet you can recieve a twice daily syndicated email containing up to date forecast information for publication. Contact enquiries@metoffice.gov.uk

Social media

The Met Office continually posts up to date weather and climate information across a range of social media channels including Twitter, Facebook and Instagram.

Past weather & weather data

There is a lot of historic weather and climate information on our website including:

UK weather extremes

UK monthly weather summaries

UK regions - climate

Data sets

Maps and graphs

Upcoming major events

Check out the weather for upcoming major events.

Climate

The Met Office Hadley Centre is one of the UK's foremost climate change research centres. We continuously research and monitor our changing climate, expanding the observations from past and current climate conditions and improve the projections of future global and regional climate on a range of timescales.
